Practical 10: AI Text Bias & Plagiarism

Aim

To analyze AI generated text for plagiarism and bias.
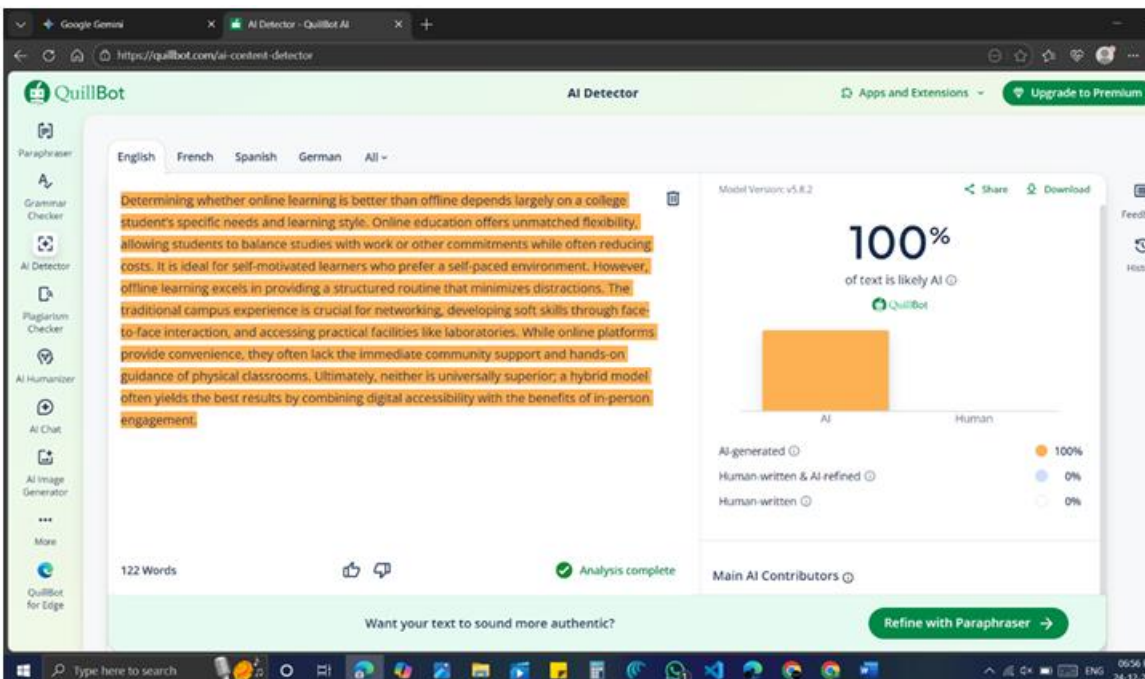

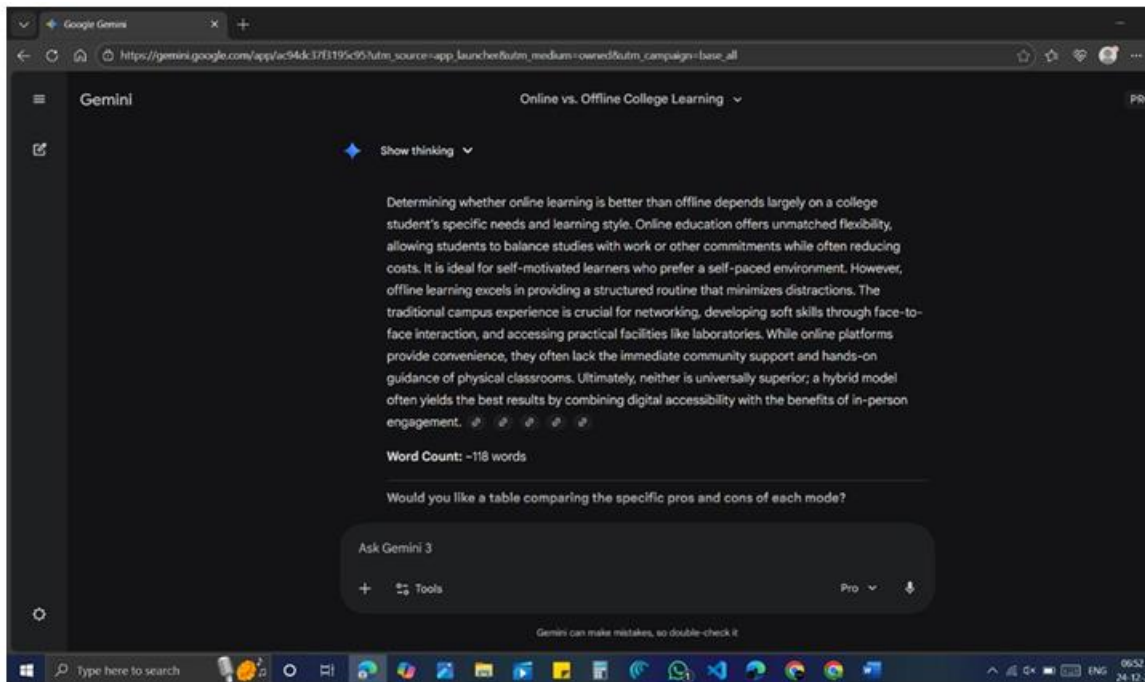

Objectives

- To detect biased statements

- To improve writing

Materials Required

- ChatGPT / Gemini

- Grammarly

Procedure

1. Generate paragraph from AI – Use an AI writing tool to produce a clear, coherent paragraph on your chosen topic.

2. Check plagiarism – Run the paragraph through a plagiarism checker to ensure originality and proper attribution.

3. Check grammar – Review the text with a grammar tool to correct errors in punctuation, spelling, and sentence structure.

4. Identify biased statements – Examine the content for subjective language, assumptions, or one-sided viewpoints.

5. Rewrite neutrally – Revise the paragraph to remove bias, ensuring the tone is balanced, objective, and fact-based.

Determining whether online learning is better than offline depends largely on a college student's specific needs and learning style. Online education offers unmatched flexibility, allowing students to balance studies with work or other commitments while often reducing costs. It is ideal for self-motivated learners who prefer a self-paced environment. However, offline learning excels in providing a structured routine that minimizes distractions. The traditional campus experience is crucial for networking, developing soft skills through face-to-face interaction, and accessing practical facilities like laboratories. While online platforms provide convenience, they often lack the immediate community support and hands-on guidance of physical classrooms. Ultimately, neither is universally superior; a hybrid model often yields the best results by combining digital accessibility with the benefits of in-person engagement.

Whether e-learning is superior to offline learning, for instance, for college students, is highly dependent on the learner's individual needs. Online learning has an unmatched level of flexibility for students who can, therefore, pursue education while working or pursuing any other obligations, which, in essence, can end up saving on cost as well. Online learning is perfect for students who can easily motivate themselves and work on their own schedule. Offline learning, on the other hand, is superior in creating an organized daily schedule for the students and eliminating distractions. Offline learning, therefore, plays an important role in network creation, in building interpersonal communication skills, and in gaining facility access, for instance, laboratories.
